

AED Trainer

XFT-120C

Features and Functions

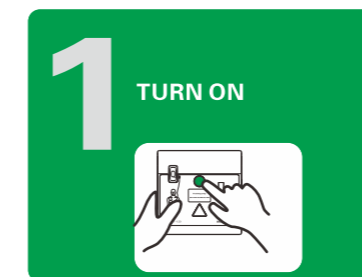

- It fully compliant with the latest AHA guidelines and is pre-programmed with 10 training scenarios, each simulating realistic instances of sudden cardiac arrest.
- The unit includes both AC and AUDIO interfaces; the AC interface allows for connection to an adapter, enabling operation via either batteries or external power supply. Meanwhile, the AUDIO OUT port facilitates connection to a speaker, which significantly enhances teaching effectiveness during instructor-led sessions.
- Equipped with two kinds of electrodes (adult or child mode).
- The device supports bilingual settings, with any language option available, and also features a Remote Control function.

Product Introduction

The XFT-120C AED Trainer with Replaceable Language/Scenario Card is designed to effectively train emergency responders in the use of an Automated External Defibrillator (AED).

This training unit provides a variety of pre-programmed scenarios to help responders become familiar with an AED and allows them to demonstrate the basic skills necessary to use an AED in an emergency. No high-voltage will be delivered, thereby ensuring safety during training.

The AED trainer is bilingual, with more than 30 language packs for selection, and custom languages can also be available.
